Colonial Coin Collectors Club

TERMINOLOGY OF AN EARLY PLOW (AS SEEN ON NEW JERSEY COPPERS)

Summer 2005

Volume 13, Number 2

Since 1935, the name *Stack's* has been linked to building great collections of colonial coins. Today's collectors take pride in owning colonials pedigreed to such great collections as Oechsner, Hessberg, Groves, Park, Robison, Eliasberg, Spiro, and Picker, to name just a few. We helped build each one of them. *Stack's* can help you build your own collection of colonials, be they coins or medals.

We maintain a comprehensive stock of colonial coins and medals. Need a type, or a particular variety? Call our retail sales department, *Stack's* can help you find what you're looking for. We can help you upgrade, we'll even take your duplicate in trade towards the price of your new purchase.

Thinking of selling your coins? We're always interested in buying colonials. Thinking about an auction for your coins? *Stack's* has conducted more auctions of colonials than all our competitors, combined, ever have. Just give us a call, we'll be glad to help with your plans.

Stack's has the expertise in colonials. *Stack's* research library is the best in the coin business. *Stack's* clientele is the finest in the hobby. We're here to help. Just put us to the test.

Send for a free color booklet about our firm and its history in American numismatics.

PRESIDENT'S MESSAGE

(Ray Williams, President)

Good day to one and all! Well... Summer's over and I'm looking forward to the increased numismatic activity that occurs in the Fall when the weather becomes cooler. We have much to look forward to: the Stack's Sales of the remaining Ford Collection, and also the C4 Convention and Auction. Thinking about the C4 Convention... the Educational events are lined up for Friday night, M&G has the auction consignments, the cataloging is in progress, the C4 room is reserved, the C4 Reception is arranged for Thursday night, the exhibitors are lined up... The only areas that we still are in need of help are for lot viewing and C4 Table duty. Dennis Wierzba is coordinating lot viewing -- please contact him to volunteer. If you could give an hour or two during the convention to work at the C4 Table, it will be a fun experience. No special talents are needed. You just greet people, take any dues payments the members have, and give out brochures. What a great way to rest your weary feet for an hour!!! Contact me if you're available. The success of C4 has been the direct result of many many volunteers for over a decade!

The state of the hobby is strong. Research is continuing in many different areas. Authors are finalizing their manuscripts. Please, if a researcher and/or author asks for information or images, help as quickly as possible. We're anxious to have their work in our libraries!

A short while ago, I was invited to a friend's house for a day of sharing with colonial numismatic enthusiasts. I had a GREAT time! It's always fun to spend time with others that are afflicted with the same colonial numismatic addiction! As much as we love our family and friends, it's a rare occasion when one of them can fully appreciate that new variety or special die state. Even if there's only one other C4 member within 100 miles of your house, try to get together to have fun sharing the hobby.

C4 Newsletter

Thinking about family, the collection that gave us so much pleasure acquiring can be as much of a nightmare for our family to dispose of intelligently in our estates. Of course, our families would prefer that we sell our own collections while we can, because we (hopefully) know what we're doing. Realistically, we should leave specific directions with our inventory lists as to how to sell the collection. Also, don't forget to include your library. Many of us have accumulated numismatic specialty books that are worth a considerable amount. I'd hate to see my original Crosby or Maris in a church book sale for 25 cents.

Thinking about books, it amazes me that there are some who collect colonials with little more than a Red Book! If you could use a book or two but don't know what to get, contact the C4 Librarian, Leo Shane, for a recommendation. If you wanted to preview an expensive book before purchasing it, see if it is in the C4 Library to borrow. Someone once said, "Buy the book before the coin", but recently I read on line a better truth, "Read the book before buying the coin".

In closing, I just want to say that I look forward to seeing as many of you as possible at the C4 Convention. If you have never met me, PLEASE find me and introduce yourself. Make your hotel reservations as soon as possible. Also, don't hesitate to contact me or any other C4 officer if we can be of help in any way.

Have Fun!

Notice of the 2005 C4 Convention Dates

November 17-20, 2005 at the Bay State Coin Show, Boston, MA Radisson Hotel (Theater District); 617-482-1800 (for reservations only...not for show information) and ask for the special "Bay State Coin Show" rates.

Thursday night – Reception;

Friday night - Educational Forum;

Saturday night - Auction (C4 and/or EAC members only)

Summer, 2005

SURVEY OF COLONIAL COINS RECOVERED IN SOUTHERN NEW JERSEY -- PART II

(Wayne H. Shelby)

Introduction: After the publication of my first article in the C4 Newsletter "Survey of Colonial Coins Recovered in Southern New Jersey" (Winter- 2003, Volume 11, Number 4) I have recovered and documented a number of additional finds from the Burlington County, New Jersey area. I believe that these recoveries and the addition of tables 5 thru 10 will provide a more in depth picture of the typical coins used and carried during colonial and early America.

Most additional finds are the result of my locating new metal detecting sites (57 thru 71). However, some finds are the result of my continued effort metal detecting at various sites previously listed in my last publication (sites 1 thru 56). The finds are documented accordingly.

Table #2 was revised by further breaking down the less commonly used foreign coins by type, denomination and ruler. This was accomplished by a thorough re-examination of my collection using various reference books as a guide. I was also able to specifically identify a number of pieces previously listed in my last publication.

In sites numbered 1 thru 56, I give the total number of coins found, and then **provide a listing of the more important and identifiable ones**. The less important coins or ones identifiable only to generic type or metal type will appear later in Table #2, "Summary of 1116 coins dug in Southern New Jersey".

Editor's note: Part I of this article appeared in the C4 Newsletter, Volume 11, Number 4 (Winter 2003).

C4 Newsletter

With my latest addition of sites numbered 57 thru 71, I recorded all coins found at that particular location including those identifiable only to generic or metal type.

Sites numbered 1 thru 71 account for a total of 903 coins, of which I can identify 555 while the remaining 348 were so deteriorated from their years in the ground that specific attribution was impossible. However, many of the 348 unknowns could at least be generally classified as to generic type or at least metallic composition, and will be included in following tables. These tables are:

Table 1: Dates of reign for foreign rulers.

Even though their date cannot be deciphered, some of the found coins can be identified when only the country and/or ruler are visible. Helpful reference material is provided in Table 1, which correlates country, monarchs and their respective dates.

Table 2: Summary of 1116 coins dug in Southern N.J.

This table provides a complete list of 1116 coins I have found in the Burlington County area. It is inclusive of the 903 coins found at the 71 sites described above in addition to another 213 finds from other sites throughout the area. Also note that further evaluation of the 348 unidentifiable coins listed in the inventories from the 71 sites has reduced the census of absolute unknowns to only 155, which coins still bear no clues as to what they might have been.

Table 3: The survey with condensed categories.

This table summarizes the 1116 by general type. Note that 155 coins could not be identified other than to metal type - they were in effect "metal disks."

Table 4: Spanish America/Spain silver by mint mark.

In this table, I've provided a listing of Spanish and Spanish Colonial silver coins that had enough detail to identify as to date and mint. For coins found in one of the 71 sites, the number of the site is listed; those recovered from an unspecified Burlington-area site are indicated with an "xx."

In the following discussion of the 71 sites, it should be noted: "Spanish" is taken to mean Spanish-American, except in four cases, which are indicated by "Spanish (mint)," which are pistareens or their fractional parts from mainland Spain.

Table 5: Colonial America coins by variety.

In this table I've provided a listing of Massachusetts, New Jersey, Connecticut, Vermont and Machin's Mills coins with enough detail to identify by known varieties. For coins found in one of the 71 sites, the number of the site is listed; those recovered from an unspecified Burlington County area site are indicated with "xx". This table also lists the quantity of the known varieties found.

Table 6: Accounting of cut coins.

This table provides a listing of the cut fractional portion of the coin recovered by country of origin, type, composition and /or date when enough detail remains to do so. For coins found in one of the 71 sites, the number of the site is listed; those recovered from an unspecified Burlington County area site are indicated with "xx".

Table 7: Accounting of holed coins and/or attempted holing.

This table provides a listing of the coins altered by holes or attempted holing by country of origin, type, and composition and or date when enough detail remains to do

C4 Newsletter

so. Further details provide the general location of their occurrence and shape.

Table 8: Accounting of countermarked coins.

This table provides a complete listing of my various countermarked coins by country of origin, type, composition and/or date when enough detail remains to do so.

Table 9: Accounting of counterfeit coins.

This table provides a listing of the identifiable counterfeit coins by country of origin, type, composition and or date when enough details remain to do so. An accurate accounting is not possible because a large majority of coins documented in the survey are made of copper. The coins exhibit various stages of corrosion and or deterioration due to their years of being exposed to the elements and various ground conditions. Some dug coins may retain the most intricate details to provide us with specific attribution while others are so badly deteriorated only the generic type or metal composition is identifiable. Therefore, I believe the actual percentage of the counterfeit coins to be much higher than documented in my survey.

Table 10: Special interest coins and artifacts.

This table provides a listing of a few larger denomination coins which appear to have been hidden and evidently lost or forgotten, possibly due to devastation of the structure by fire. Other special interest items are some early American coppers which appear to have been targeted by vandalism and the listing of various scale/coin weights by their markings to possibly reveal our early buying and trading habits.

I am also reporting other notable artifacts found to provide better insight as to the actual age of these locations. To identify by

Summer, 2005

number the various military buttons found at these sites use *Record of American Uniform and Historical Buttons Bicentennial Edition*¹.

The following is a useful guide to the reader for the approximate dates of the various button types:

Doublet:	c. Pre 1700
Vent Back:	c.1700-1765
Spun Back / Tombac:	c.1740-1795
Brass / No Back Marks:	c.1740-1795
1-Piece Back Marked:	c.1795-1840
2-piece Back Marked:	c. Post 1840

The following is a useful guide to the reader for the percentages associated with the general quantity terms:

General Quantity Terms:

Occasional	1 to 5%
Few	10% or less
Some	11 to 25%
Many	26 to 45%
Approximately	46 to 54%
Most or Mostly	55 to 89%
Generally	90% or more
Practically all	96% or more

Complements of most quantity terms are necessary. A complement is defined as one of two mutually competing parts. The terms occasional, few, some, many, approximately and most require complements of some kind to account for the entire 100%.

Each of my documented site numbers 1 thru 71 gives a listing of artifacts found at that particular site. By listing the approximate number of buttons found, the types recovered and by applying the

C4 Newsletter

general quantity terms to the types found, we are able to decipher an approximate time period the site was inhabited.

Other metal artifacts found commonly but not reported consistently throughout my listed sites include musket balls, thimbles, drawer pulls, watch top winders, lead seals, complete or parts of shoe buckles, belt buckles, knee buckles and utensils. Some of the dug buttons and cuff links show ornate designs of various patterns; others commonly exhibit animals, plants or flowers. Coin weights are of special numismatic interest.

Obverse/Reverse

CONTEMPORARY COIN WEIGHTS RECOVERED
FROM THE VARIOUS SITES

Site data are presented immediately below, with the Tables following in numeric order.

SITE # 1 *** BURLINGTON COUNTY, NEW JERSEY

Recovered coins: 24 total

1775 English counterfeit halfpenny	1808 U.S. half cent
1785 Spanish 2 real	1814 U.S. large cent
1797 U.S. large cent	1822 U.S. large cent
1799 U.S. silver dollar	1828 U.S. large cent
1803 U.S. half dime	No date Carolus III Spanish 1/2 real

Remarks: Artifacts mostly concentrated, some scattered over approximately 5 acres. Probably was once a house-site or some other type of structure.

Artifacts: Approximately 120 buttons: mostly back marked, some spun back or brass with no back marks. Artillery button: (AY 21--1802 to 1808), glass wax seal/stamp.

SITE # 2 *** BURLINGTON COUNTY, NEW JERSEY

Recovered coins: 14 total

1735 English halfpenny	1803 U.S. half cent
1763 Irish halfpenny	1810 U.S. large cent

2 skilling	Not Legible	xx	1

Note: "xx" indicates that the coin was found in Burlington County, N.J. but not at one of the categorized 71 sites

TABLE 10. SPECIAL INTEREST COINS AND ARTIFACTS

1799 U.S. Draped Bust silver dollar: Bubbled, blistered and cup shaped.

Probably was hidden and then lost to fire. (See Site #1)

1806 U.S. Draped Bust dime: Bubbled, blistered with approximately 2/3 of coin remaining

Probably was hidden and then lost to fire. (See Site #33)

1793 U.S. large cent (Chain): Entire edge and rim flattened around coin

up to where the design of the chain begins. (See Site #68).

No date U.S. Liberty Cap large cent: Hammered flat to approximately the diameter of a

U.S. half dollar. (Burlington County, NJ).

1779 English George III gold guinea (counterfeit cut 1/2): Found approximately 2 feet below the original surface after a field was scraped during construction of a warehouse. The coin was along the outside of what appeared to be an outline of a foundation. Large amounts of charred wood were visible below the plow zone, the structure was probably lost to fire. (See site #13)

Scale/coin weights:

- 1) Raised PS within recessed square, incuse D with numeral 4 below. Reverse: blank. (Cumberland County)
- 2) Raised PS within recessed shield, incuse S with numeral 2 below. Reverse: 5-20. (Cumberland County)
- 3) Raised PS within recessed shield, incuse S with numeral 6 below. Reverse: 17-12. (Site #54)
- 4) Incuse 3 made into a script Z with script letter B to right. Reverse: same. (Site #43)
- 5) Incuse 3 made into a script Z with a period near top right side. Reverse: same. (Burlington County)
- 6) Raised 13 Shilling or 13 skilling above spaced numeral 9 and 6. sprigs below. Reverse: outer & inner circle of dots. Note: Difficult to confirm (H from K) due to corrosion in that area. (Site #33)

Note:

Site number 63 is not included in my survey since it is not located in New Jersey. However, I have provided a list of the coins and artifacts to reveal a number of important and interesting finds including a New York State copper (seated figure facing left variety).

SITE # 63 NEW CASTLE COUNTY, DELAWARE

Recovered coins: (total 6)

1766 Irish George III halfpenny

1775 English George III halfpenny (counterfeit)

1787 New York copper

1803 U.S. large cent

1804 U.S. half cent

No date English George III halfpenny-
(counterfeit)

Remarks: Artifacts concentrated, probably was once a house-site

Artifacts: Approximately 11 buttons, mostly backmarked, some spun back or brass with no back marks, few vent back. Design knee buckle, colonial iron stirrup.

CONCLUSION: This survey has provided information from numerous metal detecting sites I have discovered over the past 19 years in hope of giving an accurate perspective of the typical coins used in this region during colonial and early America.

Most of these sites once contained homes or were areas supporting work or other activities and remained undisturbed until my initial findings.

The coins that I have found represent those which were carried for everyday transactions and were dropped at these sites during everyday activities. Larger denominations of silver and gold probably were not carried on ones person very often, or even used by common folk at all.

525 colonial/foreign coins (this number excludes US coins found) were recovered and documented in the survey. The following percentages by majority reveal the most commonly circulated pieces by country of origin.

<u>Country of origin</u>	<u>Total Coins/Percentage</u>	
English coins	252	48.00%
Spanish America/Spain coins	105	20.00%
Colonial America coins	75	14.29%
Irish coins	58	11.05%
French coins	11	2.10%
Portuguese coins	10	1.90%
Other foreign coins	14	2.66%

Recapping my evaluation of the coinage from England, Ireland, Spanish America and Spain revealed the following important information regarding the circulation patterns and or availability of certain coin types and denominations.

Recovered: 252 English coins:

(A count of halfpennies & farthings) 247 total

210 halfpennies or 85.02%

37 farthings or 14.98%

Note: Included in the figures above are 38 counterfeit halfpennies and 2 counterfeit farthings. Other non-attributable counterfeits may exist but are not identifiable due to corrosion. No Charles II halfpennies were attributable in the survey. No Regal George III halfpennies or farthings were attributable in the survey.

Recovered: 58 Irish coins:

(Account of halfpennies & farthings) 54 total

52 halfpennies or 96.30%

2 farthings or 3.70%

Note: Non-attributable counterfeit Irish halfpennies may exist but are not identifiable due to corrosion.

Recovered: 105 Spanish America/Spain coins:

(A count of silver bust type, pillar type, pistareens and cobs) 102 total

87 bust type or 85.29%

8 pillar type or 7.84%

3 pistareens or 2.94%

4 cobs or 3.92%

Note: Included in the figures above are 10 counterfeit bust coins and 1 counterfeit cob.

Most of the circulating English, Irish and Spanish America coinage listed above can be narrowed down to 3 basic types and/or denominations which are as follows:

English halfpennies

Irish halfpennies

Spanish America bust silver

These 3 basic types and/or denominations alone account for 349 pieces out of the 525 colonial/foreign coins listed in the survey or 66.47%.

It is interesting to note that Tables 6, 7, and 8 reveal a large portion of our circulating coinage (64 coins out of 1116 or 5.73%) were either cut, holed, attempted to be holed or countermarked. These physical alterations were apparently common place in the pockets of our colonial and early American ancestors.

Cut coins:	24	2.15%
Holed coins and/or attempted holing	34	3.05%
Countermarked coins	6	0.53%

Thanks to Ray Williams and Roger Moore for the photos included in this survey.

All artifacts and coins found on private property were with the owners permission.

ISAAC COLLINS' PUZZLE

(David D. Gladfelter)

Assume that you are Isaac Collins, the King's Printer in the Colony, soon to be State, of New-Jersey. The time is March, 1776, and the agents of King George III, after nearly eight years of delay, have at long last granted royal approval to the colonial legislature's authorization to print the 25th issue of New Jersey bills of credit. The authorization calls for printing of £100,000 worth of new bills and an additional £25,000 for replacement of worn bills.¹ The Revolution is barely three months away and a new Provincial Congress answerable to the public has just been elected.² You have

¹ Eric P. Newman, *The Early Paper Money of America*, 4th ed. (Iola, 1997), p. 256.

² "At this time, during the awkward change in governments, there were two distinct legislative powers in New Jersey, both claiming and exercising power, with several members of one being also members of the other. As legal printer to the King, Collins continued to abide by the conditions of his commission. As printer to the elected Assembly also, he was obligated to serve the public. Therefore, in name only he was printer to King George. Collins and his workmen were close witnesses to the Revolution as it evolved in print. We can imagine, for example, the printing shop in the closing months of 1775 and the early months of 1776: type being composed for the 'ordinances' of the Provincial Congress simultaneously with impressions being made of the 'laws' of the old Assembly." Richard F. Hixson, *Isaac Collins, a Quaker Printer in 18th Century America* (New Brunswick, 1968), pp. 50-51.

C4 Newsletter

the contract by royal commission and need not prepare a competitive bid, but you have Yankee frugality and this is only your second experience with such a job.

The specifications are laid out for you, including the denominations into which the issue is to be divided and the number of bills required to be printed of each denomination. You are to print and deliver 81,250 bills of the 1-shilling denomination, 62,500 of the 18-pence, 50,000 of the 3s, 37,500 each of the 6s and 12s, 25,000 of the 15s and 12,500 of the 30s. Each of these seven denominations is to have face designs printed in red and black. In addition, you are to print and deliver 6,250 bills of the £3 denomination and 3,125 of the £6 denomination with face designs printed in red and blue, coincidentally, the colors soon to be adopted by our new nation. The nature printed backs of all denominations are to be in black.

How, Mr. Collins, do you fulfill this contract, using the least possible amount of time, labor and materials?

The real Isaac Collins had to figure out the answer from scratch, but you as his modern-day surrogate have some clues to follow. They are:

- You know the sheet structure chosen by Collins for the seven lowest (red and black face) denominations. It is a double pane sheet of 24 subjects, printed each side with the backs of the left pane adjacent to the faces of the right pane, the individual bills lined up in two columns of six subjects each, with two guide holes in the margins between the panes which go over pins in the printing chase so as to line up the 24 subjects on the sheet when the other side is printed.³

³ At least one such 24-subject sheet of the March 25, 1776 issue of New Jersey bills of credit survives today. Ford 6:541 (illustrated in the catalog). This double pane sheet now belongs to a New Jersey collector. The 18th century practice of using guide holes and pins

Summer, 2005

- You know that Collins changed the lineup of subjects on the foregoing sheet at least once, and you know what those different lineups were.⁴

- As for the two red and blue face denominations, the £3 and £6 (neither of which have plate letters), you know that Collins printed them separately from the other seven, and that at least some of the £3 denomination bills were printed from a single form in 4-subject sheets with adjacent faces and backs and vertical margin guide holes.⁵ You know that only a single face form (and likely a single back form as well) were used, not only because of the lack of plate letters, but also because the identical error “Reign” with umlaut instead of dot over the “i”, appearing on every £3 bill of this issue.⁶

on a flat bed letterpress to line up 2-sided printed matter can be seen today in the print shop at Colonial Williamsburg.

⁴ At least one 12-subject pane of the foregoing issue, with two of the subjects differing from those on the panes of Ford 6:541, survives today. Jacob Spiro sale (H.M.F. Schulman, March 18, 1955, lot 1232), now owned by a different New Jersey collector. The lineups are given in Newman, *op. cit.*, p. 459, and are as follows:

Ford sheet, left column, 3s plate letter B, 6s B, 18d B, 15s (no plate letter), 1s A, 30s; right column, 3s A, 12s B, 18d C, 18d A, 1s B, 1s C.

Spiro pane, same as above except that the bottom position bill in the left column is the 6s plate letter A instead of the 30s, and the 4th position bill in the right column is the 12s A instead of the 18d A.

At present, it is not known which of the sheet structures, Ford or Spiro, was printed first. It is theoretically possible to make such a determination from such evidence as broken type or cuts, or by the miraculous future discovery of some contemporaneous shop record.

⁵ At least one such 4-subject sheet of the £3 denomination of the foregoing issue survives today. Ford 10:4801 (illustrated in black and white and in color in the catalog). Cited in Newman, *idem*.

⁶ Newman, *op. cit.*, p. 256 (illustrated). The printing of each of these small sheets required twice as much work as the printing of each of the large 24-subject sheets. Each 4-subject sheet had to be passed over the red form twice on each side, as well as over the blue form and the black form twice on each side. Because the black and red forms were well separated on the sheet, they were probably inked separately and the red and black colors printed simultaneously; this assumption is confirmed by the traces of red ink frequently showing on the black backs of the £3 and £6 denominations, but not on those of the lower denominations. The blue ink was clearly applied after the red, in a separate

- You know that some of the individual £6 bills show, at the top, traces of the blue border used on the £3 bills.⁷

Because no one knows for certain how Collins fulfilled the contract, there may well be more than one possible answer to the puzzle. One such answer, consistent with the facts given above, appears on page 50.

Several of our members relax at Carnegie Deli just prior to the Ford IX auction. Left to right: (standing) Jack Howes ; James Martin; (seated) Craig McDonald; Ray Williams; Dan Friedus; John Louis; Dave Palmer; Robert Martin; Neil Rothschild, Syd Martin.

inking and printing operation, as the blue border color frequently overlaps the red central color. Such an operation would require 8 passes per 4-subject sheet, whereas the 24-subject sheets required only one pass over the black chase and one over the red on each side for a total of 4 passes per sheet. Apparently Collins thought it would be more work to make multiple forms for the £3 and £6 denominations than to print repeatedly from a single form. Personal correspondence with E.P. Newman, August, 2005.

⁷ E.g. Ford 10:4767 (illustrated in black and white and in color in the catalog). This denomination, only, of the 25th issue has the signature RITTENHOUSE in the left end red cut, indicating a subcontract by Collins to [David] Rittenhouse for this cut and possibly others used in the currency printing contract.

C4 General Membership Meeting at San Francisco

ANA: 30 July 2005

(Leo Shane, Acting Secretary)

A meeting of the general membership of C4 was held at the ANA Annual Summer Convention on 30 July 2005 in San Francisco CA. The meeting was opened by C4 Region 2 Vice President Dr. David Menchell at 9:00 AM. In usual C4 fashion, all in attendance were asked to introduce themselves and tell the audience a little about what they collect.

Those in attendance were;

Roger Siboni	Leo Shane
Willie Quaranie	Tom Gesner
Eric Hildebrant	Dave Wnuck
Clem Schettino	Alex Schettino
Eric Li Cheung	Randy Clark
Franklin Noel	Douglas Law
Tom Rinaldo	Frank McGrath
Larry Gaye	David Menchell

David reviewed the C4 Convention dates in Boston (17-20 November) and made a call to get consignments for the auction in as soon as possible. He also asked for interesting Colonial purchases and finds that occurred during the show. Eric Li Cheung reported “cherrypicking” a few R-6 Connecticuts, a misattributed Maris 60-p New Jersey and a misattributed Nelson-8 Voce Populi.

The next few minutes were spent discussing exhibits at the show that might be of interest to C4 members. They included:

- A 1787 Brasher Doubloon (One of the Highlighted Exhibits)

C4 Newsletter

- Early Americana – With a Copy (not original) of the declaration of Independence and coins including a 1776 Continental Dollar (also a Highlighted Exhibit)
- A study of the Kentucky Cent and the First Fifteen Statehood Quarters
- Coins of Colonial New York 1700-1750
- American Half Cents 1787-1857
- A Selection of George Washington Pieces From Early America
- A Colonial Merchant's Dilemma (Foreign Gold and Silver Coins used in 18th Century America)

There was an announcement at the meeting that arrangements had been made by the CNLF (Colonial Newsletter Foundation) to donate its library including the Barnsley collection to the ANS in New York.

The next topic discussed was the C4 auction in November. Tom Rinaldo reported that the auction has many good coins already consigned but is still in negotiation for an “Anchor” collection which will set the tone of the auction.

A suggestion was made to advertise a half price C4 membership for the first year that would allow the collector to bid in the upcoming auction. Also a suggestion was made to have periodic updates on the Colonial E groups about the auction.

Research works were briefly discussed with Clem Schettino stating that he will present the second 10 families of counterfeit British half pennies at the C4 convention with 10 more families presented sometime after that. The entire series will be published in the CNL and eventually in book form.

Tom Rinaldo also announced that Bud Bibbins is making arrangements to donate a number of Blacksmith Tokens to the C4

Summer, 2005

auction. Bud would like the proceeds of these tokens to contribute to Research and publishing of numismatic works.

A call was made for articles and related historical tidbits for the newsletter. On behalf of Syd Martin – Editor, Leo Shane offered help to “would be” authors. The newsletter publishes important research articles but also has a place for “lighter” pieces that relate to the American Colonial era.

The meeting concluded at 10:00 AM with discussions spilling into the hallway, down to the bourse floor.

ISAAC COLLINS'S PUZZLE: A SOLUTION

Mr. Collins would need to print 6,250 sheets having the Ford layout (see footnote 4) in order to satisfy the 12,500 quota for the 30s denomination. This hypothetical press run would also produce 12,500 bills of the 15s denomination and a like number of 12s bills from the form having plate letter B.

To satisfy the 25,000 quota for the 15s denomination and the 37,500 quota for the 12s denomination, he could print another 6,250 sheets having the Spiro layout (see footnote 4).

The Spiro press run, together with the Ford run, would yield a total of 300,000 bills, of the following denominations and plate letters:

1s total: 75,000, 25,000 each from plate letters A, B and C
18d total: 62,500, 12,500 from plate letter A and 25,000
each from plate letters B and C
3s total: 50,000, 25,000 each from plate letters A and B
6s total: 37,500, 12,500 from plate letter A and 25,000 from
plate letter B

C4 Newsletter

12s total: 37,500, 12,500 from plate letter A and 25,000
from plate letter B
15s total: 25,000
30s total: 12,500

The foregoing hypothetical yield corresponds exactly with Newman's tally of the specific number of bills emitted in each of the seven lowest denominations of the 25th issue of New-Jersey bills of credit (given at page 256 of the 4th edition, method at page 28), with two exceptions: Newman states that an additional 6,250 bills of the 1s denomination were printed for a total of 81,250 bills, and that an equal number of 6s bills (18,750) were printed from plate letters A and B rather than the unequal numbers shown above.

The former discrepancy could have been resolved by Collins totally unlocking the chase, removing the 1s face forms A, B and C and the three corresponding back forms, and resetting them in a "mini-sheet" 6-subject layout, such as one having single columns of 3 faces and backs each, for a small separate press run of 1,042 mini-sheets.⁸ The latter discrepancy I cannot explain, unless the colonial printing records consulted by Newman were incorrect.

It remains to account for the printing of the £3 and £6 bills. If Collins used a 4-subject sheet format, such as Ford 10:4801, to do this, the most economical way would have been to have set up a form with the £3 and £6 faces on one side and the corresponding backs on the other, and print 1,563 (or so) sheets to take care of the required 3,125 £6 bills.⁹ This would leave 4,687 £3 bills to be

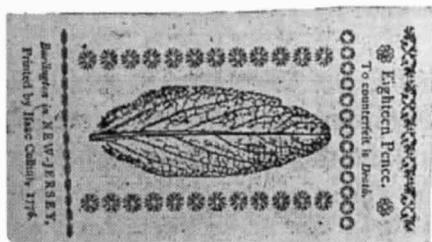

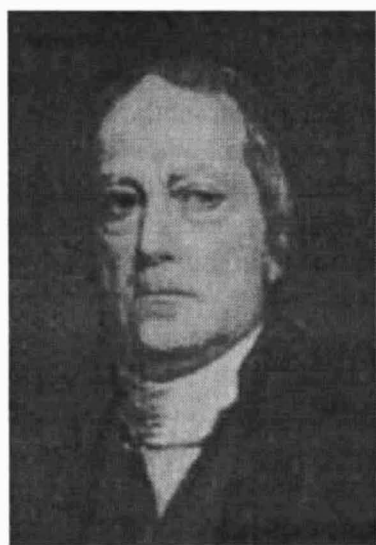

⁸ This would produce 6,252 individual bills, 2 more than needed. Doubtless, Collins printed some extras of all denominations to take care of spoilage. Personal correspondence with E.P. Newman, September 12, 2000.

⁹ See footnote 7 above for evidence that the £6 and £3 bills were printed together.

Summer, 2005

printed, which could have been accomplished by printing 1,172 sheets of £3 bills only, 4 to a sheet, in the Ford 10:4801 format.¹⁰

And the job would be done.

Isaac Collins (portrait by John Wesley Jarvis, courtesy of Rutgers University Press) and a photo of one of his colonial notes.

¹⁰ Eric Newman postulates that as a security measure as well as an economical one, Collins could have mounted one of the color printing forms on the hinged platen of the press, applied ink to it, and printed this color on the top side of the paper while the black form (and possibly one of the other color forms) were simultaneously printing the bottom side of the paper. After drying of the paper, it would be turned over, fed back into the press and this process repeated, accomplishing the multicolor printing in two passes through the press. Like Franklin's nature printing on colonial bills of credit, this process would have been kept secret so as to foil counterfeiters. Newman believes that such a process may have been used in the printing of the October 1, 1773 Pennsylvania issue, or in any or all of the intricate bicolor U.S.-guaranteed bills of credit issued in 1780 by the states of MA, MD, NH, NJ, NY, PA, RI and VA, or in the 14th January 1779 issue of Continental currency, all of which were printed by the firm of Hall and Sellers, Philadelphia. Personal correspondence, August 2005 (for which I thank him). It is an ingenious and entirely plausible theory. I'm not persuaded, however, that Collins used it, because of the observed overlapping of colors in his work as mentioned in footnote 7. In contrast, there is no overlapping of colors on the Hall and Sellers bills. Further discussion of this hypothetical process must be left for future research.

BOOK REVIEW

(Ed Sarrafian)

Cobs, Pieces of Eight, and Treasure Coins 1536-1773 Cobs, by
Seward Menzel

This recently published book by the American Numismatic Society (ANS) is the book of cobs that I always wanted to read but had never been published.

The book begins with a brief history of the kings that ruled over the Latin American countries, a general depiction of the coin designs of each country, and how a cob is made.

The bulk of the book goes into the specifics of each of the Latin American countries coin output. Not only does Mr. Menzel plate examples of the coins produced under each country and monarchy but he also plates examples released under each of the assayers. The coins plated are above average for the given issue. The book is nearly 500 pages and there are 1200 types listed in the book with nearly 3000 photographs.

All in all this is a terrific book that the advanced or beginner cob collector will enjoy as well as those individuals who may not collect cobs but are interested in the dominant money that circulated in colonial America.

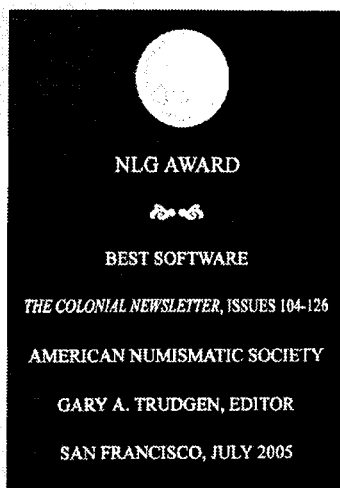

KUDOS

Congratulations to the ANS for receiving recognition on behalf of the Colonial Newsletter, which is edited by Gary Trudgen!

Bob Vlack's book "An Illustrated Catalogue of the French Billion Coinage in the Americas," which was published by C4 last year, was recently awarded the Fred Bowman Literary Award at the meeting of the Canadian Numismatic Research Society (CNRS). Bob is one of the "Old-Timers" still active in colonial numismatics. Die Varieties have been named for him, and he has done pioneering research in many colonial areas, even when they weren't popular. At 78, he has experiences from his early days that few of us can imagine. When you see Bob, congratulate him on the French colonies book and on the award it received. It was well deserved.

We at C4 can be proud of our journal. Out of a large number of candidates, it received third place for "Specialty Club Newsletters" from the Americana Numismatic Associations. This is a credit to our authors, editors, and everyone else who helps get this newsletter to the membership!

ANNOUNCEMENTS

Gallery Mint Museum Awarded Non-Profit Status: Arkansas firm now eligible for grants, tax-deductible donations.

(Eureka Springs, AR)—In a move culminating 13-years of planning by its founders, the Gallery Mint Museum (GMM) announced it has been granted non-profit 501(c)(3) status by the state of Arkansas. The move allows the popular mint to immediately begin organizing a museum of minting technology.

“It was always our dream to establish a museum that would preserve the history, craftsmanship and artifacts associated with the minting of coins and printing of paper money,” said GMM co-founder Ron Landis. “We now have the organizational structure and legal recognition to do so.”

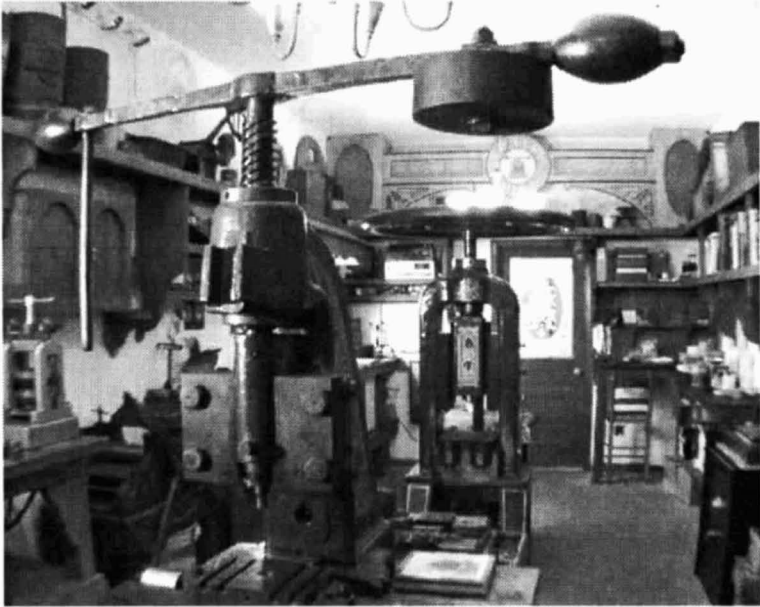

Officially known as the Gallery Mint Museum Foundation, Inc., the new non-profit organization is a separate entity from the Gallery Mint, Inc. “The Gallery Mint will continue to operate as a for-profit company. We are two separate entities now” explained Landis.

GMM will retain a number of consultants over the next few months as they build towards the opening of their numismatic museum, tentatively in 2006. “Joe would be thrilled to see our dream coming true,” said Landis, in reference to his partner Joe Rust, who died earlier this year. A fund-raising campaign will be announced shortly.

For more information about the Gallery Mint Museum Foundation, contact Mike Ellis at POB 706, Eureka Springs, AR 72632;

C4 Offers New Vlack Book on French Colonial Coins. The third monograph published by the Colonial Coin Collectors Club (C4) has been released, *An Illustrated Catalogue of the French Billon Coinage in the Americas* by the noted numismatist Robert A. Vlack. This is the first comprehensive guide to the billon coinage that circulated in the French colonies of the Americas, which included Canada, Louisiana and the French West Indies. An 18-page introduction discusses the history of the coins and includes a rarity listing of the various counterstamped billon coins authorized for use in Canada during the seventeenth century. This is followed by an extensive and well-illustrated catalogue of the coins (pp. 20-157) reflecting over thirty years of research by Vlack on this topic. The catalog proceeds from the *Mosquetaires* of 30 and 15 *deniers* to the billon *Sous Marqués* and *Half-Sous Marqués* and then to contemporary counterfeits. It next includes a full listing of billon coinage and counterstamped billon coins of the French West Indies, as well as a discussion of the coins known as "black dogs." The work was amended and edited by Philip L. Mossman with typesetting and graphic design by Gary Trudgen.

C4 Newsletter

In the catalogue every denomination is divided into sections, one section for each of the various French mints producing that denomination; some denominations were issued from as many as thirty different mints! Each mint section contains an explanation of all the mintmasters and engravers associated with that mint during the years of issue. The specific coins from the mint are then cataloged by year with annotations on mintage, rarity and variants. There are numerous illustrations with enlarged details of overdates and errors that are especially useful to the user in identification. This is the first time such information has been made available in English.

The folio size hardcover book (157 pp.) is available for \$50.00 US plus \$5.00 for shipping (\$6.50 to Canada and \$13.50 to Europe) from Ray Williams [REDACTED].

For further information on this book and other books published by the Colonial Coin Collectors Club, as well as joining the organization, visit the C4 website at: www.colonialcoins.org

Founded in 1960, *The Colonial Newsletter* (CNL) has continuously published some of the most scholarly and seminal studies in early American numismatics. Focusing on the study of the coinages produced by the states during the Confederation period of the United States, *CNL* also investigates a variety of other specie that our forefathers used in their daily lives.

Published three times a year by The American Numismatic Society (ANS), *CNL* is available at the rate of \$35 per year for ANS

Summer, 2005

members and \$45 per year for non-members. For inquiries concerning *CNL*, please contact Juliette Pelletier at e-mail pelletier@amnumsoc.org or telephone (212) 571-4470 ext. 1311. *CNL* can be ordered online at <http://store.yahoo.com/amnumsoc/itforpur.html> or a subscription form can be downloaded from the ANS web site at www.amnumsoc.org/cnl/.

A few words about *CNL* from your president.

When I first became interested in collecting colonial coins, a friend suggested that I would not regret subscribing to *The Colonial Newsletter*. I took his advice and he was right! After receiving a few issues, and a cumulative index for all of the past issues, I ordered a complete set of back issues. It is probably the most useful tool in my library. I'm going to make the same recommendation to you – subscribe today. You will not regret it!

Back issues of *CNL* are available on CD, which are searchable. If you would like to read a few samples of *CNL* articles, go to the C4 web site at <http://www.colonialcoins.org> and click on “RESOURCES” then click on “CNL”. You can also view the cumulative index which will provide an idea of what the content has been in past issues.

The current editor of *CNL* is Gary Trudgen, for whom I have a great deal of respect. His knowledge and professionalism are well known in colonial numismatics. Plus he's just one of the “good guys” in the hobby – always helpful to the novice and expert alike! This page is not a paid advertisement, just something your president feels strongly about. After spending hundreds or thousands on coins, why not spend a few dollars to help you appreciate your collection? Do it today before you forget! RJW

Cheapside Tokens

Enthusiastic buyers, sellers and students of the 18th Century British Token Series.

We offer tokens for every pocketbook and interest from the rare and spectacular to those used in everyday commerce. Our website and occasional lists will provide you with an ever growing and eclectic selection for your consideration.

An Unsurpassed Record of **AUCTION SUCCESS**

We invite you to become part of our spectacular auction season. When it comes time to sell, you deserve the best - Bowers and Merena Galleries. Whether your collection is worth several thousand dollars - or many multiples of that figure - we can help you realize the highest possible market value price for your colonial coins.

We have handled some of the most famous of all colonial coin collections ever assembled, including the Garrett, Taylor, Norweb, and Saccone collections, to name just a few. Many great colonial rarities have crossed the auction block under our family banner. From Brasher doubloons to rare state coinage issues, from New England silver rarities to important Washington pieces, we have handled them all!

When you consign to Bowers and Merena Galleries, you consign to the most successful rare coin auction firm in American numismatic history. Why not let our success be your success as well? Call toll free at 1-800-458-4646 to consign your collection or important single colonial rarities to one of our upcoming sales. What we have successfully done for so many others, we can do for you! When great collections are sold, Bowers and Merena sells them.

AMERICAN NUMISMATIC RARITIES

The New Standard in Colonial Coin Auctions

American Numismatic Rarities was founded by some of America's best known numismatic talent. We take pride in our treatment of your coins at public auction. Accurate and elaborate descriptions, superb in-depth research, and a world-class graphic and photographic presentation are our standards. Our staff has unsurpassed experience and knowledge of pre-federal coinage issues. Our catalogues are created as an enduring contribution to collectors and researchers of these important issues, not as a momentary marketing vehicle. Our consignors receive the best possible results, and our bidders enjoy first-class service and the knowledge that the coins they purchase have been evaluated with incomparable expertise.

Become acquainted with the staff and auctions of American Numismatic Rarities as either a consignor or as a bidder. Take advantage of our special offer to members of C4: Send us a receipt for a \$500 purchase in the last year and you will receive our next two catalogues at no charge, while a \$2,000 receipt from same period will place you on our catalogue mailing list for a full calendar year with our compliments.

Contact Rick Bagg or John Pack to discuss consigning your coins, or speak with our Director of Numismatic Research, John Kraljevich. Call 866-811-1804 or visit us online at www.anrcoins.com.
